## M E T A L

As Brn Metal, we have produced machine parts, equipment, and accessories for many of our customers from different sectors for over ten years.

In our facility with a closed area of 1,500 m<sup>2</sup> in Adana Metal Works Industrial Site, we carry out precise and high-quality production for the needs of our customers for many different markets, from automotive to energy and defense industry, with our state-of-the-art machinery.

Our company makes continuous improvements in its machinery, taking into account the needs of our customers, produces primarily machining and welded manufacturing, as well as pipe bending, bolts, hot forged product manufacturing, trailer equipment, energy transmission line fittings, and parts for the Defense Industry.

**Our focus is on "High Quality".**

### Machining

For the automotive and defense industry; We offer Machining solutions in the production of parts requiring high precision.

### Welded Manufacturing

For the automotive industry & energy industry transmission lines; We offer gas metal, argon, laser, and similar welded construction solutions.

### Pipe Bending

For the automotive industry & energy transmission lines; We offer pulling bending, wrapping bending, press twisting, and roller bending solutions.

### Bolt Manufacturing

For the automotive industry and mining industry; We offer standard or special bolts, nuts, studs, and anchor fastener solutions.

### Hot Forged Product Manufacturing

For the automotive and mining industry; We offer carbon and alloy steel part manufacturing solutions in various sizes and shapes.

### Machinery Spare Parts Manufacturing

For all industrial sectors; We offer manufacturing solutions for all kinds of machine spare parts according to the given technical drawing, specification, or sample.

### Defense Industry Parts Manufacturing

Brn Metal systematically produces the design, product development, prototype manufacturing, special manufacturing, and mass manufacturing that our defense industry needs.

### Trailer Equipments

We provide solutions to the automotive industry in trailer superstructure and infrastructure manufacturing with our fully equipped machinery and high production quality.

### Power Transmission Lines Accessories

For the energy sector, vibration dampers, corona rings, and many other spare parts are manufactured for transmission lines.
